Oxygen Safety Information

Important advice for oxygen users

Check list...

- You should not smoke when using oxygen.
- Battery operated cigarettes must not be used with oxygen.
- No cooking when using oxygen (electric or gas).
- Turn off oxygen for a minimum of 30 minutes before using any heat source (Inc. cooking, smoking or using any appliance which emits heat such as hair straighteners or electric blankets).
- Do not use any type of candle in the home.
- Oxygen tubing should not trail near or over a heat source, be aware of the trip hazards.
- Do not use oils or grease such as Vaseline or petroleum based products on the skin.
- Do not remove any fire breaks from the oxygen tubing.
- Vehicle use – switch off oxygen before refueling or arrange for someone else to fuel up for you.

If you are woken by your smoke alarm – **GET OUT, STAY OUT AND CALL 999**
