

# Smoke Alarms

## Working smoke alarms save lives

### Get it...

- We recommend an alarm with a 10 year sealed battery unit.
- The full unit will need to be replaced within 10 years.
- Standard battery alarms are the cheapest option, but you need to replace the battery every year.

### Install it...

- Fit a smoke alarm to the ceiling on every level of your home.
- You should avoid putting them in the kitchens and bathrooms.
- Keep them clean and clear of dust.

### Test it...

- Make time for your home's unsung heroes and test your smoke alarms once a week **#TestitTuesday**

If you are woken by your smoke alarm – **GET OUT, STAY OUT AND CALL 999**
