Keeping yourself safe from fire

Top Tips for keeping yourself safe from fire...

- Working smoke alarms save lives. Ensure they are fitted to the ceiling on each level of your property. Test them weekly.
- Switch off electrical equipment such as chargers, hair straighteners etc. as soon as you have finished with them.
- Charge devices whilst you are awake, not when you are sleeping.
- Avoid overloading plug sockets by using inline adapters.
- If you smoke, make sure you put cigarettes right out and avoid smoking in bed.
- Avoid cooking when you are tired or if you have had alcohol. Have a takeaway or a cold snack instead.
- Keep the oven, hob and grill clean. A build up of fat and grease can easily catch fire.
- Always keep your fire exits and escape routes clear of obstructions.
- Ensure fire doors are closed at all times and not left propped open.
- Plan your escape route in case of a fire, have a back up plan in the event your first escape route is blocked.
- Make sure everyone knows where door and window keys are kept.
- If the smoke alarm sounds make your way out as quickly as possible, take the stairs—do not use a lift.

In the event of a fire, use your escape plan—GET OUT, STAY OUT and call 999
